

Usage Manual

This is the first frame that appears on from the app. The user can click start here to start playing music or close to close the app.

This is the 2nd frame that appears. The user can select from a range of 12 instruments. The user then clicks on the note that they want to play as seen in the screenshot. If the user wants

to record his playings, then he can record by pressing the record button. The user can also save and open tune files. The tune file is just a txt file with one tune in it. If a user opens a tune file the tune is stored in a variable which the user can playback by hitting the play recording button.
